

PROTO

SUVETERRASS

Thank you for coming. We are delighted to host you. The most important Czarist-Russian submarine factory has become a harbour campus open to people and the sea. Proto Invention Factory was established to provide meaningful entertainment. We believe this is the way to inspire interest in our surroundings, increase the thrill of inventing and the courage to create change. If you get the chance, step inside and have a look around.

Our summer terrace menu is inspired by Latin-American cuisine, which is all about the richness of flavours and respect for tradition. First and foremost, we were inspired by Peruvian cuisine, which extends from the Pacific Ocean to the heights of the Andes. Indigenous techniques, European influences and global flavours meld together in harmony. Try fresh ceviche, a fast and fresh coastal dish or Anticuchos de corazon, cooked on street corners encased in clouds of smoke.

Most importantly, Peruvian food is about coming together – cooking in order to meet up and talk – be it an evening with the family or a Sunday lunch with friends.

Take some time to enjoy the atmosphere, seascape, flavours and drinks, but more than anything – the company.
